WORK EXPERIENCE

Cash4You Corporation, Cambridge, ON
Business Analyst

Dec 2022 – Present

- **Bonus Points Program**
 - Developed a performance-based bonus points portal to reward employee actions tied to KPIs, working with IT, marketing, and compliance to ensure accuracy and alignment with company policies.
 - Built point calculation logic, designed a user-friendly interface, and created backend reports to track redemptions and engagement for leadership visibility.
- **Requirements Management and Quality Assurance**
 - Gathered and analysed business and software requirements, creating detailed Software Requirement Documents (SRD) to guide developers in implementing updates to the POS system
 - Conducted User Acceptance and Functional Testing, collaborated with the QA team, reviewed test reports, prioritized issues, and updated SRDs, resulting in improved system functionality and performance
- **Fraud Prevention Rules Development**
 - Analysed teller transaction data and system behaviour using SQL, cleaned datasets, and generated reports, identifying fraud patterns
 - Collaborated with management and stakeholders to design and implement 15+ fraud prevention rules, successfully reducing fraudulent transactions
- **Decision Engine Model Enhancement**
 - Evaluated Ontario rent/mortgage data to enhance debt-to-income ratios, performing agile testing on 10+ lending limit versions to confirm the model's accuracy and responsiveness
 - Partnered with developers, third-party providers, and the central authorization team to optimize the decision engine model, boosting its overall functionality

QAD, Mumbai, India

Aug 2019 – Dec 2020

Junior Business Analyst

- **Agile & User Acceptance Testing**
 - Prepared user stories and acceptance criteria for Agile sprints, conducted User Acceptance Testing and collaborated with developers to resolve issues, ensuring enhanced product functionality and smooth delivery
- **Business Requirements & Process Mapping**
 - Collaborated with product managers to capture and refine business requirements for ERP enhancements, ensuring process mapping and integration to improve functionality and meet client needs
